

Figure 1

Figure 1 consists of two panels, (a) and (b), showing histograms of the number of nodes per cluster.

(a) Histogram of the number of nodes per cluster for the network obtained by the proposed algorithm. The x-axis is labeled "Number of nodes per cluster" and ranges from 0 to 10. The y-axis is labeled "Frequency" and ranges from 0 to 10. The distribution is highly skewed towards smaller clusters, with a peak at 1 node.

(b) Histogram of the number of nodes per cluster for the network obtained by the proposed algorithm. The x-axis is labeled "Number of nodes per cluster" and ranges from 0 to 10. The y-axis is labeled "Frequency" and ranges from 0 to 10. The distribution is more spread out than in (a), with a peak at 1 node and a secondary peak around 6-7 nodes.
